

MAFI 9837

EPDM 40mm x 20mm

L=10 meter

Trapezoidal sheet
metal roof

About the Product

EPDM is used as a water sealment on the Solar Rail when mounting on trapezoidal sheet metal roof. The material is robust to not lose performance in the Nordic climate.

Flexibility

The EPDM can be fastened along the Solar Rail or cut 40mm x 40mm to cover the fastener.
