

MAFI 9850

EPDM SQUARE 40 mm x 40 mm x 2 mm (500 pcs)

Trapezoidal sheet
metal roof

About the Product

EPDM is used as a water sealment on the Solar Rail when mounting on trapezoidal sheet metal roof. The material is robust to not lose performance in the Nordic climate.

Flexibility

The EPDM SQUARE is precutted and shall be mounted on the Solar Rail where the screw is to be mounted to the roof.
